

FREQUENCY

Board FREQUENCY

FREQUENCY

How do your fellow players rank 'green' as their favourite colour?

Is 'green' a 1, because he/she doesn't like the colour at all, or is 'green' a 10, the absolute favourite colour?

In this exciting and entertaining game, it's all about how well you know your fellow players! Can you judge their favourite colours as accurately as possible on a scale of 1 to 10 or even guess exactly?

There are many different categories that represent the preferences, favourites or preferred things of the other players and where you can prove how well you know each other.

If you hit the right number, you can move forward. If you miss, you stand still. Special cards can help you get to the finish line faster, but you can also be thrown back.

Show that you are on a FREQUENCY, guess your fellow players correctly as often as possible, be the first around the board and experience fun and exciting guessing rounds full of surprises and new insights. Even if you don't finish first, you can get to know your fellow players much better and everyone wins!

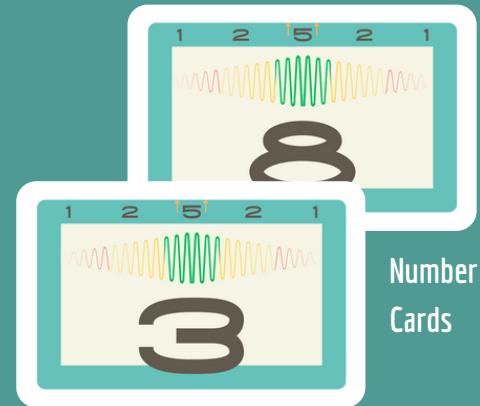

So the only question that remains is, are you on the same FREQUENCY?
